Acknowledgment is made of applicant's election in the response of May 24, 2002. Applicants' comments to the restriction requirement set forth in the previous Office Action are noted. However, the restriction requirement is maintained at this time for the reasons set forth in the previous office action.

Accordingly, claims 2-5, 7, 8, 10-17, 19 and 21-26 have been withdrawn from consideration as being directed to non-elected subject matter.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 6, 9, 18 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over De Lombaert et al US 5,550,119 taken with, Seido et al US 5,801,271.

De Lombaert et al US '550 teach phosphorus compounds of the type recited in the claims. See column 7, lines 1-10. Patentees do not teach the benzyloxycarbonylamine substituent. However, Seido et al US '271 teach analogous pentonic acid derivatives

Art Unit: 1625

which contain this group in compounds having the same utility. To modify the previous reference to include this feature would have been obvious to one of ordinary skill in the art as the cumulative results would not have been unexpected.

No claim is allowed.
